

Title: Neon Blade Arena

Genre: top-down sword survival action

Target: local playable prototype toolchain selected by the user

Player fantasy: the player is a fast duelist cutting through glowing enemies.

Core loop: dodge pressure, slash enemies, collect energy, survive the timer, retry.

Controls: WASD movement, mouse aim, left click slash, space dash, R reset.

Camera: top-down follow camera with readable arena framing.

Mechanics: slash arc, dash cooldown, enemy waves, pickups, health, score streaks.

Progression: one arena with thirty second pressure ramp and wave pacing.

Assets: premium neon dark arcade style, sharp silhouettes, glowing feedback.

UI: health, timer, score, dash cooldown, wave count, retry prompt.

Win: survive the timer and clear the final wave. Fail: health reaches zero.

First playable: one arena, player, two enemy types, pickup, win, fail, retry.

QA: movement, slash hit, dash, enemy damage, pickup, win, fail, reset.

Constraints: no menus, store publishing, accounts, multiplayer, monetization.
